Professional Summary

Information Technology graduate focused on frontend web development with hands-on experience building responsive web applications using React.js, JavaScript, and CSS. Hands-on experience developing reusable UI components, managing application state, and working with browser storage and APIs. Built projects involving travel booking, job application tracking, and AI-powered code analysis.

Education

Netaji Subhas University of Technology — New Delhi, India
Bachelor of Technology in Information Technology — *2021 – 2025*

Experience

Shauryats Solutions Pvt Ltd — May 2024 – July 2024
Frontend Developer Intern — *New Delhi, India*

- Built responsive user interfaces for an educational platform using React, HTML, and CSS for teachers and students to manage tests.
- Created forms using React state to help educators customize test details like question counts, difficulty levels, and mark distributions.
- Integrated frontend components with REST APIs for features including user login, profile updates, and test generation.

Projects

AI Code Analyzer & Developer Utility | *React.js, Node.js, Gemini API* — August 2026

- Developed a React-based developer tool that analyzes code, suggests refactoring improvements, and identifies potential bugs using AI.
- Created a Node.js and Express backend to handle AI API requests while keeping the Gemini API key server-side and hidden from the frontend.
- Structured AI prompts for JSON responses and dynamically displayed code analysis with severity counts and syntax highlighting.
- Implemented error handling for API failures and rate limits, and stored recent analysis metadata using browser localStorage.

Travel Booking Website | *React.js, CSS, Vite* — July 2026

- Developed a responsive travel booking SPA with simulated flight and hotel search, selection, and reservation workflows.
- Managed application state and persisted user wishlist and dashboard data using localStorage.
- Implemented client-side navigation with React Router and organized the application into reusable React components.
- Implemented search filters and multi-step checkout forms with strict validation utilizing React Hook Form.

Job Application Tracker | *React.js, Tailwind CSS, Vite, localStorage* — July 2026

- Built a responsive React application to add, view, search, update application status, and delete job application records.
- Managed application state using React Hooks and persisted job data in the browser using the localStorage API.
- Added search and filter features to easily find specific jobs, along with a button to download the application history as a CSV file.
- Built a dashboard to track application progress and integrated toast notifications for user feedback.

Technical Skills

Languages: JavaScript, C++
Web Technologies: HTML5, CSS3
Frameworks & Libraries: React.js, Node.js
Developer Tools: Git, GitHub, Vercel
Core Concepts: API Integration, Responsive Web Design, JSON
